World Web Technologies Announces New WebRezPro™ Interface and Features in release 10.2.

CALGARY, ALBERTA, April 24, 2007 - World Web Technologies today announced the release of version 10.2 of its increasingly popular Web-based property management system, WebRezPro. This all new release features a completely redesigned user interface, a powerful new calendar feature, full search tool and enhanced time-saving shortcuts.

“Release 10.2 of WebRezPro features a very user-friendly look and feel” said Frank Verhagen, President of World Web Technologies. “With a sophisticated new calendar function and shortcut menu, the WebRezPro property management system is easier than ever to use.”

WebRezPro is an Internet-based property management system for hotels and lodging operators of small and medium sized properties. Accessible from anywhere, WebRezPro offers more flexibility than any other property management system available.

“The new calendar function in this release makes WebRezPro faster and easier to use” says Janie Agar, Director of Sales and Marketing for World Web Technologies. “Users can access specific dates throughout the system with a single click, speeding up their access and increasing efficiencies.”

Version 10.2 of WebRezPro is a complete business solution for accommodations providers featuring a full property management system combined with an accounting suite, Web reservation engine, GDS integration and more. With its all new interface and powerful new features, WebRezPro pricing remains unchanged starting at only \$5 per room per month.
